VERIFIED ENVIRONMENTAL PRODUCT DECLARATION | ISO 14025 & EN 15804

Smart thinking, smart building

Owner of declaration

Taasinge Elementer A/S Bjernemarksvej 54 5700 Svendborg, Denmark. VAT: DK33510691

Programme

EPD Danmark www.epddanmark.dk

□ Industry EPD ⊠ Product EPD

Declared product(s)

Taasinge Elements \hat{A}/S prefabricated facade element F-2 (wooden load bearing facade element)

Number of declared datasets/product variations: 1

Production sites

Bjernemarksvej 54 5700 Svendborg, Taasinge, Danmark

Burskovvej 17 9870 Sindal, Danmark

Palsgårdvej 5, 7362 Hampen, Danmark

Rūpniecības iela 39 3008 Jelgava, Latvia

Product(s) use

The prefabricated facade element (F-2) can be installed in buildings hence being part of the building wall.

Declared/ functional unit

1 m² prefabricated facade element (F-2)

Year of production site data (A3) 2021

EPD version First edition

Taasinge Elementer

Smart thinking, smart building

Issued: 05-03-2024

Valid to: 05-03-2029

Basis of calculation

This EPD is developed in accordance with the European standard EN 15804+A2.

Comparability

EPDs of construction products may not be comparable if they do not comply with the requirements in EN 15804. EPD data may not be comparable if the datasets used are not developed in accordance with EN 15804 and if the background systems are not based on the same database.

Validity

This EPD has been verified in accordance with ISO 14025 and is valid for 5 years from the date of issue.

Use

The intended use of an EPD is to communicate scientifically based environmental information for construction products, for the purpose of assessing the environmental performance of buildings.

EPD type

Cradle-to-gate with modules C1-C4 and D
Cradle-to-gate with options, modules C1-C4 and D
Cradle-to-grave and module D
Cradle-to-gate
Cradle-to-gate with options

CEN standard EN 15804 serves as the core PCR

Independent verification of the declaration and data, according to EN ISO 14025

Product information

Product description

The main product components are shown in the table below.

Material	Weight-% of declared product
Spruce wood (beams/battens)	33,4
Wind barrier (fiber cement board)	28,7
Gypsum board	24,5
Glass wool insulation (incl. glass wool tape)	10,1
Window flashing (aluminium), vapour barrier (plastic) & screws and nails	<4

Product packaging:

The composition of the sales- and transport packaging of the product is shown in the table below.

Material	Weight-% of packaging
Spruce wood	41
LDPE film	58
Metalic fasteners	1

Representativity

This declaration, including data collection and the modeled foreground system including results, represents the production of Taasinge Elementer A/S prefabricated F-2 facade element in Denmark or Latvia. Product specific data are based on values collected in the period 2021, and economic allocation is applied complying with EN 15804 and EN 16485. The EPD is a product specific EPD declaration. Background data are based on LCA for Experts 10.7 with Sphera database and Ecoinvent 3.8 database and are less than 10 years old. Generally, the used background datasets are of high quality, and the majority of the datasets are only a couple of years old.

The products are produced in Denmark/Latvia and also sold in Denmark. Therefore, a Danish EoL scenario is included, and the geographical region covered is primarily Denmark.

Hazardous substances

Taasinge Elementer A/S F-2 prefabricated facade element does not contain substances listed on the "Candidate List of Substances of Very High Concern for authorisation"

(http://echa.europa.eu/candidate-list-table)

Essential characteristics

Taasinge Elementer A/S F-2 prefabricated facade element is covered by harmonised technical specification EN 16485. Declaration of performance according to EU regulation 305/2011 is available for all declared product variations.

The products comply with the requirements of prEN 14732-1:2006 Timber structures – prefabricated wall, floor and roof elements – part 1: Product requirements. The used wood is FSC or PEFC certified.

Further technical information can be obtained by contacting the manufacturer or on the manufacturers website:

www.taasingeelementer.dk

Reference Service Life (RSL)

No RSL is declared. This EPD is based on a cradle to gate with modules C1-4 and D and does not include the use stage.

Picture of product(s)

Figure 1: Taasinge Elementer A/S prefabricated facade element (F-2).

LCA background

Declared unit

The LCI and LCIA results in this EPD relates to 1 m^2 facade element (F-2).

Name	Value	Unit
Declared unit	1	m ²
Weight per declared unit	39,75	kg/m ²
Density	123,1	kg/m ³
Thickness	323	mm
Conversion factor to 1 kg.	0,025	-
Moisture content	14	%

Functional unit

Not defined.

PCR

This EPD is developed according to the core rules for the product category of construction products in EN 15804, and EN 16485:2014.

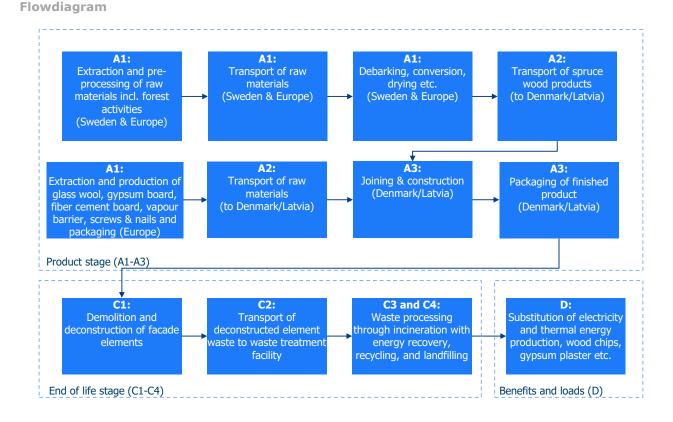

Guarantee of Origin – certificates

Foreground system:

The product is produced using 100% wind power certified electricity in Taasinge and Sindal factories. While for the latter factories (Hampen & Latvia) it is modelled with a residual grid mix approach.

Background system:

Upstream processes are modelled using residual grid mix. Downstream processes are modelled using consumption mix.

MD-23223-EN_Rev1 | Taasinge Elementer A/S | Page 5 of 12

System boundary

This EPD is based on a cradle-to-gate LCA with options, where modules C1-C4 and D are also considered, in which 100 %-weight of the product has been accounted for.

Specific application of the facade element, if windows and doors are included in there, can further include the use of wind barrier tape, vapor membrane tape and sealant. However, these are not considered in the EPD as it is within the exclusion (cut-off) limit.

The general rules for the exclusion of inputs and outputs follows the requirements in EN 15804, 6.3.5, where the total of neglected input flows per module shall be a maximum of 5 % of energy usage and mass and 1 % of energy usage and mass for unit processes.

Product stage (A1-A3) includes:

- A1 Extraction and processing of raw materials
- A2 Transport to the production site
- A3 Manufacturing processes

The product stage comprises the acquisition of all raw materials, products and energy, transport to the production site, packaging and waste processing up to the "end-of-waste" state or final disposal.

Taasinge Elementer A/S receives spruce wood from Sweden. At the production sites in Denmark and Latvia, the wood is built together with wind barrier (fiber cement board), gypsum board, glass wool insulation, window flashing, vapour barrier, and screws and nails.

In module A3, for production at Taasinge and Sindal, 100% wind power is modelled. While for Hampen and Latvia production sites residual grid mix electricity supply is used.

Construction process stage (A4-A5) includes:

Modules are not included in this study.

Use stage (B1-B7) includes:

Modules are not included in this study.

End of Life (C1-C4) includes:

When the buildings are being demolished the facade element is deconstructed and sorted at site. There after the different constituents are either sent for recycling, incineration (w. energy recovery), and landfilling.

Wood is recycled into wood chips and incinerated (w. energy recovery). Gypsum boards are recycled. Fiber cement boards, glass wool, and other materials are considered landfilled.

Re-use, recovery and recycling potential (D) includes:

During the incineration process of wood, heat and electricity is produced. Recycling of wood and gypsum also occurs, where wood chips and gypsum plaster are avoided produced. Likewise, cardboard, iron/metal, and certain mixed waste is sent for recycling.

LCA results

The LCA results are presented for the F-2 prefabricated facade element product.

Caption	The numbers are declared in scientific notation, fx 1,95E+02. This number can also be written as: 1,95*10 ² or 195, while 1,12E-11 is the same as 1,12*10 ⁻¹¹ or 0,000000000112.										
	¹ The results of this environmental indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator.										
Disclaimers	² This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

Additional information

LCA interpretation

The raw material which is of most importance is spruce wood, which also constitute most of the column and beam products. The manufacturing stage (A3) taking place in Denmark includes trimming, assembly and packaging the final products. These activities are not linked with high consumption of energy or waste generation, hence they are not linked with high environmental impacts as can be confirmed by the results.

Technical information on scenarios

End of life (C1-C4)

Scenario information	Value	Unit
Collected separately	23,02	kg
Collected with mixed waste	16,73	kg
For reuse	-	kg
For recycling	15,99	kg
